

## vatman tech

### **What is vatman tech?**

A subscription advisory service on technical VAT matters for the accounting profession, with unlimited email queries or calls.

### **Is it a helpline?**

No, we aim to respond to email queries within 48hrs but it is not a helpline and we cannot guarantee phone contact at any particular time.

### **Is there any limit on usage?**

No, in practice email queries average out over the period of the subscription and usage is not monitored.

### **How much does it cost?**

A 12-month subscription costs £300.00 plus VAT.

### **Is it just VAT?**

Yes, we are VAT specialists and do not advise on other taxes.

### **What is a query?**

A query is any VAT question which typically takes 15 mins or less to resolve.

### **What if I have something more complicated?**

That would be a project and we would give you a specific quotation, for example, a report or analysis, or assistance in a dispute with HMRC.

### **What kind of VAT issues does vatman tech cover?**

It is intended to be the ultimate VAT resource for the accounting profession, if we cannot deal with a VAT issue directly we can outsource it to a partner organisation in the x-vat network, for example, e-commerce and EU VAT registrations or criminal investigations by HMRC etc.

### **What other services does x-vat provide?**

Apart from online advisory services we can provide VAT consultancy, training, appeals and software services.
